

Dear Hiring Manager,

I am writing to express my strong interest in the SEO Manager role at Mindgruve. As a digital SEO practitioner with 5+ years of hands-on experience across agency, in-house, and consulting environments — and a Master's in Informatics with a thesis on semantic content and structured data — I am particularly drawn to Mindgruve's position at the intersection of data, creativity, and technology.

Why I'm a Strong Fit for This Role

1. GEO & AI/LLM Strategy

Your job description emphasizes creating SEO narratives for the AI landscape — this is where I've been actively building. At YCP Group, I lead Generative Engine Optimization (GEO) initiatives, developing tools and strategies to optimize brand visibility across AI Overviews, ChatGPT, and Perplexity. I don't just follow AI trends — I build GEO tools that operationalize them. This aligns directly with your need for someone who can deliver future-forward SEO, not just the playbooks of yesterday.

2. Full-Spectrum Technical SEO

My Master's thesis examined how semantic content and schema markup impact search engine visibility — giving me a research-backed foundation in technical SEO. I have spent years executing site audits, internal linking strategies, Core Web Vitals remediation, schema implementation, and crawl optimization across B2B consulting, e-commerce, and government clients. Tools like GA4, GSC, Ahrefs, SEMrush, and Screaming Frog are second nature.

3. Agency & Cross-Functional Collaboration

I've thrived in agency settings — from YCP Solidiance to DailySEO ID — where SEO never operates in a silo. I have partnered with content, PR, social, and development teams to embed SEO into broader marketing strategies. At YCP, I collaborated across multiple departments on the Renoir Service Page revamp, ensuring SEO was integrated from briefing through delivery.

4. Teaching & Mentoring

Beyond client work, I serve as a Technical SEO Instructor at HariSenin.com and DailySEO Bootcamps, and as an Adjunct Lecturer in Digital Business at UIN Salatiga. I mentor practitioners through live audits, case studies, and structured curricula. I bring this same clarity and patience to junior team members — fostering a culture of shared growth and knowledge transfer.

5. Data-Driven Communication

I believe SEO impact is only as strong as the story you tell with data. I produce regular performance reports that translate technical metrics into actionable business insights for stakeholders — a skill I've refined across multiple client relationships and teaching environments.

What Draws Me to Mindgruve

Your reputation as a Top 3% Google Premier Partner and recognized Inc. 5000 company speaks to the caliber of work and culture you have built. "A place where every opinion is valued" resonates deeply with me — I've experienced firsthand how environments that empower ideas produce the best work. I am ready to bring my technical depth, GEO expertise, and collaborative mindset to help your clients accelerate growth.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Thank you for your time and consideration.

Best regards,

Ade Rizki Yulianto
